Business Insight Support Associate
Ernst & Young (EY)
India

RE: BUSINESS INSIGHT SUPPORT ASSOCIATE - APPLICATION

I am applying for the Business Insight Support Associate position at EY. The role's focus on data gathering, Excel and PowerPoint reporting, BI support, and stakeholder communication aligns directly with the work I have been doing for the past year - and the opportunity to bring that experience to a Big 4 professional services environment is one I am genuinely motivated by.

At Logistics Integrators, I owned the end-to-end reporting cycle for weekly MIS reports covering **10+ operational KPIs** across freight operations, sales, and finance. This involved data gathering from multiple source systems, cleaning and validating entries in Excel, and producing performance summaries delivered to operations and finance leadership on fixed reporting cycles. I built the **Power BI dashboards and Excel reporting tools** (Pivot Tables, Power Query, advanced formulas) that the three teams referenced in every weekly review - eliminating discrepancies that had previously caused disputes in those sessions.

Data accuracy was non-negotiable in that environment. I ran **daily reconciliation and validation checks**, cross-referencing source data before it entered any report or dashboard. I also maintained audit-ready documentation of metric definitions and data workflows - a practice I understand is directly applicable to a BI support function within EY's internal analytics or GDS track.

My **MBA in Operations Management** from ICFAI Business School equips me with structured business thinking that supports translating raw data into clear, decision-ready insights - exactly the kind of value a Business Insight Support Associate is expected to deliver. I am detail-oriented, comfortable with high-volume data tasks, and experienced in communicating findings to non-technical stakeholders across multiple business functions.

I would welcome the opportunity to contribute to EY's business intelligence support work and look forward to discussing my application.

Warm regards,

Subham Joshi
