PROFESSIONAL SUMMARY

Analyst with ~1.5 years building Python-automated data pipelines, SQL-based anomaly detection, and operational dashboards across logistics and supply-chain ops. Track record detecting data quality issues and operational bottlenecks, automating recurring workflows, and maintaining dashboards as the single source of truth for cross-functional teams. Strong fit for fintech ops analytics roles requiring Python + SQL + data quality ownership from day one.

CORE COMPETENCIES

Python (Pandas, NumPy)

SQL (CTEs, Window Functions, Aggregations)

Data Quality & Anomaly Detection

Workflow Automation

ETL / Data Reconciliation

Power BI Dashboards

dbt (certified)

Operational Bottleneck Analysis

Root Cause Analysis

Git

EXPERIENCE

Logistics Integrators Pvt. Ltd.

Mar 2025 - Mar 2026

Data Analyst (Management Trainee Program)

Dehradun, India

- Automated recurring workflows, data transformations, and reporting in Python (Pandas, NumPy) -- reducing manual triage time and tightening incident-response loops across operational reviews
- Wrote **SQL queries (CTEs, window functions, aggregations)** to analyze operational and sales datasets, surfacing **data quality issues and operational bottlenecks** before they impacted SLAs or revenue
- Designed **threshold-based alerting and anomaly-detection rules** across 10+ KPIs; weekly anomaly review drove targeted interventions and measurable process corrections
- Built and maintained **Power BI dashboards** serving as the single source of truth for ops, sales, and finance -- providing operational and performance insights to cross-functional stakeholders
- Owned **ETL validation, reconciliation, and data-audit workflows**; eliminated reporting discrepancies across systems and established reliable, auditable data flows
- Led **root-cause analysis** on performance spikes -- shipment delays, cost overruns, freight discrepancies -- partnering with 3-5 cross-functional teams to validate data and ship corrective actions

Vrun Minerals Pvt. Ltd.

Feb 2024 - Jul 2024

Operations / Data Analyst (Intern)

Dehradun, India

- Cleaned and validated distributor and sales datasets in Excel + Python; built deviation-highlighting dashboards on inventory and sales trends
- Performed **inventory reconciliation and data-accuracy checks** across daily operations, catching discrepancies before they reached reporting systems
- Documented data workflows and measurement definitions for non-technical stakeholders to improve transparency
- Conducted business trend analysis to inform supply-chain decisions

PROJECTS

Personal portfolio in progress (target: data-quality monitoring demo + dbt ELT pipeline project + operational bottleneck case study).

EDUCATION

MBA / PGPM -- Operations Management · ICFAI Business School, Mumbai	2025 · CGPA 6.83
Focus: data-driven decision making, process optimization, performance analytics, fintech operations.	
Bachelor of Computer Applications (BCA) · Shree Guru Ram Rai I.T.S., Dehradun	2022 · 72.68%
Foundation in programming (Python, Java), SQL databases, and analytical problem solving.	

CERTIFICATIONS

dbt Fundamentals	dbt Labs	2026
------------------	--------------------------	------

SKILLS

Python & Automation: Python (Pandas, NumPy, automation scripts), SQL (joins, CTEs, window functions, aggregations, performance tuning), Git
Data Quality & Analytics: Statistical Anomaly Detection, Data Validation, ETL Validation, Reconciliation, Threshold-based Alerting, Operational Bottleneck Detection, RCA
Analytics Engineering: dbt (dbt Core, Fundamentals cert), ELT Pipelines, Data Transformation, Workflow Automation
BI & Visualization: Power BI, MS Excel (Pivot Tables, Modeling), BI Dashboard Development, Self-serve Analytics, Looker / Metabase (familiar)
Operations: KPI Tracking, Metrics Ownership, Performance Monitoring, Cross-functional Coordination, Stakeholder Management
