Hiring Team
Services Supply Chain — Operations
Accenture in India
Mumbai Metropolitan Region

Re: Application for Warehouse Operations Analyst — Mumbai

Dear Hiring Team,

I am writing to apply for the **Warehouse Operations Analyst** role with Accenture Services Supply Chain Operations in Mumbai. My ~1.5 years at Logistics Integrators have been spent directly in **supply chain analytics** — owning freight KPIs, leading RCA on shipment delays and cost overruns, reconciling inventory, and building the single source of truth for cross-functional supply chain reporting. That maps tightly to the Supply Chain Control Tower visibility this role is designed to deliver.

At Logistics Integrators, I owned weekly Power BI dashboards tracking **10+ KPIs across freight operations** — on-time delivery, turnaround time, transportation cost — partnering with warehouse, transportation, and finance teams (3–5 functional groups) to validate data and ship corrective actions. I also designed conversion, funnel, and drop-off analysis on shipment journeys (start-to-delivery) that informed operational redesigns. Earlier, as Operations Intern at Vrun Minerals, I performed inventory reconciliation and stock-accuracy checks across distributor operations. My **MBA in Operations Management from ICAI Business School Mumbai** focused on supply chain optimization and process performance.

I recognise the JD asks for 3–5 years of supply chain experience, and my hands-on years are closer to 1.5. I want to be honest about that — while also being clear that the **domain depth is genuine**: control-tower-style KPI visibility, distribution analytics, cost-overrun RCA, and process automation in Python (Pandas, NumPy) are exactly what I have been delivering. I have also just completed the **Google Advanced Data Analytics Professional Certificate** (full 7-course program, May 2026), which sharpened my statistical and modelling capabilities for forecasting and trend analysis on operational data.

I am immediately available, based in Dehradun, and willing to relocate to Mumbai. I would welcome the chance to discuss how my logistics-analytics foundation could contribute to Services Supply Chain operations at Accenture. I can be reached at joshisubham442@gmail.com.

Sincerely,

Subham Joshi
