PROFESSIONAL SUMMARY

Operations + Data Analyst with ~1.5 years in **logistics analytics at Logistics Integrators**, owning **supply chain KPIs** across freight operations including shipment journey funnels, **inventory reconciliation**, transportation visibility, and cost-overrun root-cause analysis. **MBA in Operations Management** from ICFAI Business School Mumbai with focus on supply chain optimization and process performance. 🏆 **Google Advanced Data Analytics Certified** (full 7-of-7 Professional Certificate, May 2026 — including Capstone). Skilled in SQL, Python, and Power BI for **logistics planning, distribution analytics, and quality control** — delivering single-source-of-truth dashboards used by 3–5 cross-functional teams. Backed by 9 portfolio projects including a **supply-chain KPI dashboard tracking 180,519 real orders** across on-time delivery, revenue, profit margin, and delay days. Ready to step into **Supply Chain Control Tower** visibility and short/long-term planning support.

CORE COMPETENCIES

Supply Chain Analytics

Logistics Planning

Inventory Reconciliation

Distribution & Transportation Visibility

Cost Optimization & RCA

KPI Monitoring (Single Source of Truth)

Cross-functional Coordination

Process Automation (Python)

WORK EXPERIENCE

Logistics Integrators Pvt. Ltd.

Mar 2025 – Mar 2026

Data Analyst (Management Trainee Program)

Dehradun, India

- Owned weekly Power BI dashboards tracking **10+ KPIs across freight operations** — on-time delivery, turnaround time, transportation cost — establishing the **single source of truth** for cross-team supply chain reporting, in line with control-tower visibility principles
- Led **root-cause analysis (RCA)** on shipment delays, turnaround drops, and **cost overruns** — partnering with 3–5 cross-functional teams (warehouse, transportation, finance) to validate data and ship corrective actions
- Designed conversion, funnel, and drop-off analysis on **shipment journeys (start-to-delivery)**, informing operational interventions and process redesigns that improved planning accuracy
- Built SQL-based statistical anomaly detection and threshold-based alerting on operational and distribution datasets, surfacing outliers before they impacted SLAs
- Drove data quality and data integrity workflows — validation, reconciliation, ETL audit — eliminating reporting discrepancies across logistics reporting systems
- Automated recurring reporting workflows in Python (Pandas, NumPy), reducing manual effort and improving turnaround on weekly supply chain reviews

Vrun Minerals Pvt. Ltd.

Feb 2024 – Jul 2024

Operations Analyst (Intern)

Dehradun, India

- Performed **inventory reconciliation and stock-accuracy checks** across daily distributor operations, reducing reporting errors and improving warehouse stock visibility
- Conducted **supply chain business trend analysis** on distributor and sales datasets to generate actionable insights for procurement and distribution decisions
- Cleaned and validated datasets using Excel and Python (Pandas); built dashboards with deviation highlighting on **inventory and sales trends**
- Documented data workflows and measurement requirements, improving transparency of operational metric definitions for non-technical stakeholders

PROJECTS

Portfolio 1 — Python Analytics · github.com/Zolow-kuni/data-portfolio

Fraud & Anomaly Detection System · Python · Pandas · NumPy · SciPy · Scikit-learn [GitHub](#)

Applied Z-score, IQR, and rule-based risk scoring (0–100) to 283,726 real European credit card transactions; flagged 2,838 suspicious records at a 0.17% fraud rate — dataset: 284,807 rows (Kaggle)

Interactive KPI Dashboard · Python · Streamlit · Plotly · Pandas [GitHub](#)

Built a live multi-department dashboard tracking 6 KPIs (on-time delivery, revenue, profit margin, delay days) across 180,519 real supply chain orders; 40.9% on-time delivery rate surfaced through automated alerting

Financial Data Integrity Checker · Python · Pandas · NumPy · Matplotlib [GitHub](#)

Engineered a 10-rule validation engine on 700 real Microsoft financial records; 10/10 rules passed, 14 profit outliers flagged via 3-sigma detection, completeness scored 91–100% per column

Sales & Inventory Trend Analyzer · Python · Pandas · Matplotlib · Seaborn [GitHub](#)

Analysed 9,994 real US retail transactions across 3 categories and 17 sub-categories; detected 27 seasonal anomalies, computed MoM growth and 3-month rolling averages, 12.04% overall profit margin

Google Advanced Data Analytics Certificate · github.com/Zolow-kuni/data-portfolio/tree/main/google-data-analytics-certificate

Automatidata EDA — NYC Yellow Taxi 2017 · Python · Pandas · NumPy · Matplotlib · Seaborn · Tableau [GitHub](#)

Full EDA on 408,294 NYC TLC Yellow Taxi trips (18 columns); engineered 5 features (trip duration, hour, quarter, zero-distance flag); applied IQR outlier detection and flagged ~0.5% zero-distance anomalies for TLC reporting
Built 4 Python visualisations (box plot, monthly bar chart, quarterly fare chart, hourly line chart) + Tableau scatter plot (total amount vs trip distance); documented findings using PACE framework and executive summary

Portfolio 2 — SQL · Power BI · R · github.com/Zolow-kuni/data-portfolio-2

SQL Retail Analysis · SQL · SQLite · Python [GitHub](#)

Cleaned and loaded 805,549 rows from 525,461 raw Online Retail II transactions into SQLite; wrote 15 advanced queries covering window functions, CTEs, RFM segmentation, cohort retention, and MoM revenue growth via LAG() — 5,878 customers across 41 countries

Power BI Customer Churn Dashboard · Python · Power BI · DAX [GitHub](#)

Cleaned 10,000 bank customer records (zero nulls); built a 3-page Power BI dashboard with DAX measures tracking 20.4% churn rate across demographics, credit score bands, and balance segments

Python Automation Pipeline · Python · Pandas · openpyxl · logging [GitHub](#)

Built an end-to-end automated pipeline on 1,000 retail records — ingest, clean, validate, analyse, and generate a 5-sheet formatted Excel report with timestamps; 100% data quality score, single-command execution

Customer Churn Prediction in R · R · tidyverse · randomForest · caret · pROC [GitHub](#)

Trained 3 ML models on 7,043 Telco customer records; Logistic Regression achieved highest AUC (0.837), Random Forest 0.824, Decision Tree 0.781 — outputs include 8 EDA plots, ROC curves, and feature importance chart

EDUCATION

MBA / PGPM — Operations Management 2025 · CGPA 6.83

ICFAI Business School, Mumbai

Focus: data-driven decision making, process optimization, and performance analytics.

Bachelor of Computer Applications (BCA) 2022 · 72.68%

Shree Guru Ram Rai I.T.S., Dehradun

Foundation in programming (Java, Python), relational databases (SQL), and analytical problem solving.

CERTIFICATIONS

 Google Advanced Data Analytics Professional Certificate (full 7-course program) Verify	Google / Coursera	May 2026
Foundations of Data Science Verify	Google / Coursera	May 2026

SKILLS

SQL & Python: SQL (joins, window functions, CTEs, aggregations), PostgreSQL, SQLite, Python (Pandas, NumPy, openpyxl), Statistical Analysis, A/B Testing Principles, Cohort Analysis, Funnel Analytics, Outlier Detection

Analytics Engineering: dbt (dbt Core), Data Transformation, ELT Pipelines, ETL Validation, Data Quality, Data Integrity, Process Automation

BI & Visualization: Power BI, Tableau, Streamlit, Plotly, MS Excel (Pivot Tables, Modeling), BI Dashboard Development, Self-serve Analytics, Executive Dashboards, Looker / Metabase (familiar)

Statistical Modelling: R, ggplot2, randomForest, caret, pROC, Logistic Regression, Decision Trees, ROC / AUC Analysis

Business & Operations Analytics: KPI Tracking, Metrics Ownership, Performance Monitoring, RCA / Incident Investigation, Conversion Analysis, Drop-off Investigation, Business Operations, Supply Chain Analytics, Threshold-based Alerting, Signal Monitoring

Collaboration & Communication: Stakeholder Management, Data Storytelling, Cross-functional Data Validation, Non-technical Communication, Agile

Additional: Manual Testing, API Testing, Java, ESG Reporting
