Dehradun, India · Open to relocate · Mumbai

## PROFESSIONAL SUMMARY

Data Analyst with ~1.5 years of hands-on experience in **operational analytics, KPI dashboard development, ETL processes, and data-driven decision support** for cross-functional teams. Proficient in SQL, Python (Pandas, NumPy, SciPy), R (regression, random forest), Power BI, and dbt -- covering the full analytics stack from data transformation to executive reporting. Built statistical anomaly detection on operational datasets, automated reporting pipelines, and owned dashboards tracking 10+ KPIs for senior leadership. Aviation operations share the same analytical DNA as logistics -- turnaround times, route performance, delay analysis, and operational KPIs are all within the same measurement framework I have worked in. Holds the **Google Advanced Data Analytics Professional Certificate** (7/7, May 2026) and 9 portfolio projects on 1.2M+ real records. Portfolio: [github.com/Zolow-kuni/data-portfolio](https://github.com/Zolow-kuni/data-portfolio)

## CORE COMPETENCIES

Data Analysis & Dashboard Creation

SQL & Python (Pandas · SciPy)

ETL Processes & Data Transformation

Power BI KPI Reporting

Statistical Analysis & Modelling (R)

Exploratory Data Analysis

Anomaly Detection & RCA

Reporting Automation

## WORK EXPERIENCE

Logistics Integrators Pvt. Ltd. Mar 2025 - Mar 2026

Data Analyst - Management Trainee Program · Dehradun, India

- Performed end-to-end data collection, cleaning, processing, and analysis on operational datasets (freight movements, turnaround times, delivery performance, cost data) to track KPIs and identify improvement opportunities
- Built statistical anomaly detection and threshold-based alerting on operational metrics using Z-score and IQR methods -- flagging deviations in turnaround, delays, and load performance before they impacted SLAs
- Developed and maintained Power BI dashboards tracking 10+ operational KPIs for senior leadership; conducted exploratory data analysis to identify trends, anomalies, and efficiency improvements
- Supported ETL processes and data transformation workflows: validation, reconciliation, and audit of data pipelines using Python (Pandas) and dbt -- ensuring accuracy and integrity of all reporting data
- Led root-cause analysis (RCA) on performance gaps -- delay spikes, cost overruns, turnaround drops -- translating findings into clear, actionable insights for cross-functional stakeholders
- Automated recurring reporting and data workflows in Python, building scalable analytical solutions that reduced manual effort and improved turnaround on business reviews

Vrun Minerals Pvt. Ltd. Feb 2024 - Jul 2024

Operations Analyst (Intern) · Dehradun, India

- Conducted exploratory data analysis on inventory and sales datasets using Python and Excel; identified trends, anomalies, and improvement opportunities
- Ensured data accuracy, consistency, and integrity across daily operations through reconciliation and validation checks
- Translated analytical findings into actionable insights for supply-chain and distribution decisions

PROJECTS

Fraud & Anomaly Detection System Python · Pandas · SciPy · Scikit-learn

Applied Z-score, IQR, and rule-based risk scoring to 283,726 real credit card transactions; flagged 2,838 suspicious records at 0.17% fraud rate. Demonstrates the anomaly detection and statistical analysis core to aviation safety and compliance monitoring.  
github.com/Zolow-kuni/data-portfolio/tree/main/project1\_fraud\_detection

Interactive KPI Dashboard Python · Streamlit · Plotly · Power BI

Live operational dashboard tracking 6 KPIs across 180,519 supply chain orders with automated alerting -- on-time delivery, delay days, revenue, and margins. Direct analog to aviation operational KPI monitoring for flights, turnaround, and load factor.  
github.com/Zolow-kuni/data-portfolio/tree/main/project2\_kpi\_dashboard

Customer Churn Prediction in R R · tidyverse · randomForest · caret · pROC

Logistic Regression AUC 0.837, Random Forest 0.824 on 7,043 records; 8 EDA plots, ROC curves, feature importance. Demonstrates predictive analytics and statistical modelling capability the JD lists as "good to have."  
github.com/Zolow-kuni/data-portfolio-2/tree/main/project8\_churn\_prediction\_r

SQL Retail Analysis - Cohort Retention & Trend Reporting SQL · SQLite · Python

15 advanced SQL queries on 805,549 rows: window functions, CTEs, RFM segmentation, cohort retention, MoM growth via LAG(). Demonstrates the SQL depth and ETL/data transformation skills the role requires.

SKILLS

**Python:** Pandas, NumPy, SciPy, Matplotlib, Seaborn, Scikit-learn, Streamlit -- data analysis, ETL automation, statistical modelling, visualization

**R:** tidyverse, dplyr, ggplot2, randomForest, caret, pROC -- regression, classification, predictive analytics, ROC/AUC

**SQL & Data Engineering:** SQL (window functions, CTEs, aggregations), PostgreSQL, SQLite, dbt Core, ETL Validation, Data Transformation, Data Quality & Integrity

**BI & Dashboards:** Power BI (DAX), Tableau, MS Excel (Pivot, Modeling), Operational Scorecards, KPI Dashboards, Anomaly Detection, Exploratory Data Analysis

**Cloud (basic):** Familiar with cloud data platform concepts (AWS S3, GCP BigQuery architecture) through coursework; actively building hands-on exposure
