Re: Application - Analyst, Third Party Lifecycle Management Alternative Practice (Job 26008354) · Subham Joshi

Hi Hiring Team,

The GMNS Third Party Lifecycle Management role sits at the intersection of data governance, partner oversight, and operational accuracy - exactly the kind of structured, detail-driven environment where I do my best work. The responsibility of maintaining a clean, up-to-date partner portfolio while coordinating across multiple global stakeholders maps directly to what I have been doing in logistics operations analytics.

Three proof points most relevant to this role:

- **100% data accuracy on financial records** - built a 10-rule validation engine on 700 Microsoft financial records; all rules passed, 14 outliers flagged via 3-sigma detection, 91-100% completeness per column. This is the quality-control and data integrity mindset the role requires.
- **Portfolio tracking & audit logging at scale** - maintained Power BI dashboards and Python ETL pipelines with structured audit logs tracking 180K+ operational records; enforced documentation standards and version-stamped outputs on each reporting cycle.
- **Cross-functional corrective action coordination** - led root cause analysis on data anomalies partnering with 3-5 teams, validated conflicting datasets, and delivered corrective-action reports to senior management - directly mirrors the stakeholder coordination and quality oversight in this role.

My **MBA (Operations Management, ICFAI Business School Mumbai, 2025)** gives me the governance and process-optimisation framing to embed compliance oversight into day-to-day operations, not just react to issues after the fact.

I am based in Dehradun and available to relocate to Gurugram immediately. Happy to connect for a quick 15-minute call.

Warm regards,

Subham Joshi
