Dehradun, India · Open to relocate to Gurugram · Immediate joiner

5 June 2026

**Re: Application for Analyst - Data Analytics (AIM Team) - Subham Joshi · Python · SQL · Power BI**

Hi Hiring Team,

American Express's AIM (Analytics, Investments & Marketing Enablement) team sits at the intersection of marketing analytics and data-driven acquisition - exactly where I want to build my career. The combination of customer targeting, personalisation, and statistical modelling at AmEx's scale is a rare opportunity for an analyst early in their career.

Key proof points directly relevant to this role:

- **Fraud & anomaly detection on 283,726 credit card transactions** - Z-score, IQR, and rule-based risk scoring (0-100) flagging 2,838 suspicious records; directly applicable to AIM's risk and marketing analytics work
- **Funnel and conversion analysis on 180K+ supply chain orders** - surfaced bottlenecks for senior leadership, informing operational process redesigns; equivalent to digital acquisition funnel analytics
- **SQL retail analysis on 805,549 rows** - cohort retention, RFM segmentation, MoM revenue via LAG() across 5,878 customers and 41 countries
- **Google Advanced Data Analytics Certified (7/7 courses, May 2026)** - regression analysis, A/B testing principles, statistical inference, logistic regression (AUC 0.837 on churn prediction in R)

I hold an **MBA (Operations Management) from ICFAI Business School Mumbai (2025)** and a **BCA (2022)**, giving me both the technical foundation and the business context to translate data findings into actionable recommendations for marketing and product teams.

I am based in Dehradun and available to relocate to Gurugram immediately with no constraints. Happy to connect for a quick 15-minute call.

Warm regards,

**Subham Joshi**
