Open to relocate anywhere in India (Delhi preferred) · Remote / Hybrid / On-site · Immediate joiner

PROFESSIONAL SUMMARY

Data Analyst / Analytics Engineer with ~1.5 years of experience building **SQL- and Python-based data pipelines - ingestion through validation, transformation, and delivery** - across logistics and operations environments, not just static dashboards. Hands-on with **dbt, ELT/ETL workflows, data validation, and statistical anomaly detection**, owning the full pipeline from raw data to self-serve BI delivery (Power BI, Tableau). Built an end-to-end automated ingest-clean-validate-report pipeline (100% data-quality score), a fraud-detection scoring engine on 283K+ transactions, and a SQL transformation pipeline loading 805K+ rows with advanced cohort/RFM analysis. **Google Advanced Data Analytics Certified** (7-of-7 Professional Certificate), plus PostgreSQL and dbt certifications - 15 certifications total. Targeting Data Analyst, Business Analyst, or Analytics Engineer roles in technical environments where I can build and own pipelines end-to-end.

CORE COMPETENCIES

SQL · CTEs · Window Functions · PostgreSQL	dbt · ELT/ETL Pipeline Design
Python (Pandas, NumPy) · Pipeline Automation	Data Transformation & Validation
Data Quality · Integrity · Reconciliation	Statistical Analysis · Anomaly Detection
Cohort & RFM Segmentation · Funnel Analytics	Power BI · Tableau · Self-serve BI Delivery
KPI Ownership · RCA / Incident Investigation	Cross-functional Stakeholder Management

WORK EXPERIENCE

Logistics Integrators Pvt. Ltd.

Mar 2025 - Mar 2026 · Dehradun, India

Data Analyst (Management Trainee Program)

- End-to-end pipeline ownership:** Built and owned data pipelines in SQL and Python (Pandas, NumPy) - from raw operational/sales ingestion through validation, transformation, and statistical anomaly detection - surfacing outliers before they impacted SLAs
- Pipeline automation:** Automated recurring reporting workflows in Python, replacing manual processes with repeatable, scheduled pipeline runs and reducing turnaround on weekly business reviews
- Data quality & integrity:** Drove validation, reconciliation, and ETL audit across the pipeline - eliminating discrepancies across reporting systems and establishing a single source of truth
- Delivery layer:** Owned weekly Power BI dashboards tracking 10+ KPIs across freight operations - the output layer of a pipeline that started with raw data, not a standalone static report
- Cross-functional RCA:** Led root-cause analysis on performance spikes (delays, cost overruns), partnering with 3-5 teams to validate upstream data and ship corrective actions
- Funnel/pipeline analysis:** Designed conversion, funnel, and drop-off analysis on shipment journeys end-to-end, informing operational redesigns

Vrun Minerals Pvt. Ltd.

Feb 2024 - Jul 2024 · Dehradun, India

Operations Analyst (Intern)

- Cleaned and validated distributor and sales data pipelines using Excel and Python (Pandas); built downstream dashboards with deviation highlighting on inventory and sales trends
- Performed inventory reconciliation and data-accuracy checks across daily operational data flows; documented pipeline and measurement requirements for non-technical stakeholders

SELECTED PROJECTS - PIPELINE & ENGINEERING EMPHASIS

Python Automation Pipeline - MIS Reporting ETL · Pipeline Automation

Python · Pandas · openpyxl · logging

Built a complete end-to-end automated pipeline - ingest → clean → validate → analyse → report - on 1,000 retail records, generating a 5-sheet formatted Excel report with audit logging on a single command; 100% data-quality score. [\[GitHub\]](#)

SQL Retail Analysis - 805K-Row Transformation Pipeline SQL · ELT · Advanced Queries

SQL · SQLite · Python

Designed and ran a transformation pipeline loading 805,549 cleaned rows from 525,461 raw transactions into SQLite; wrote 15 advanced queries - CTEs, window functions, RFM segmentation, cohort retention, MoM growth via LAG() - across 5,878 customers in 41 countries. [\[GitHub\]](#)

Fraud & Anomaly Detection System Statistical Scoring Pipeline

Python · Pandas · NumPy · SciPy · Scikit-learn

Built a statistical scoring pipeline (Z-score, IQR, rule-based risk scoring 0-100) processing 283,726 real European credit-card transactions; flagged 2,838 suspicious records at a 0.17% fraud rate. [\[GitHub\]](#)

Financial Data Integrity Checker Data Validation Pipeline

Python · Pandas · NumPy · Matplotlib

Engineered a 10-rule validation pipeline on 700 real financial records; completeness scored 91-100% per column, 14 outliers flagged via 3-sigma detection. [\[GitHub\]](#)

career-ops - Personal Job-Search Operating System Self-built Automation Pipeline

Node.js · YAML · Playwright · Notion API · Gmail API

Designed and built a YAML-config-driven automation pipeline: JD scoring engine, ATS-CV generation (HTML→PDF), and bidirectional tracker sync to Notion - 33 entries auto-synced in a single batch, demonstrating self-directed, end-to-end systems ownership. [\[GitHub\]](#)

EDUCATION

MBA / PGPM - Operations Management 2025 · CGPA 6.83

ICFAI Business School, Mumbai

Focus: data-driven decision making, process optimization, performance analytics.

Bachelor of Computer Applications (BCA) 2022 · 72.68%

Shree Guru Ram Rai I.T.S., Dehradun

CERTIFICATIONS

🏆 Google Advanced Data Analytics Professional Certificate (7/7 courses)	Google / Coursera	May 2026
SQL and PostgreSQL: The Complete Developer's Guide (22 hrs)	Udemy	May 2026
2025 Mastering dbt (Data Build Tool) - From Beginner to Pro (8 hrs)	Udemy	May 2026
Python for Data Science · Data Analysis Using Python	IBM / Credly	2026
Power BI Essential Training	LinkedIn Learning	Mar 2026

SKILLS

Pipelines & Engineering: SQL (joins, window functions, CTEs), PostgreSQL, SQLite, dbt (dbt Core), ELT/ETL Pipelines, Data Transformation, ETL Validation, Data Quality & Integrity, Process Automation, Python (Pandas, NumPy, openpyxl)

Analysis & Modeling: Statistical Analysis, Outlier/Anomaly Detection, Cohort Analysis, RFM Segmentation, Funnel Analytics, R (tidyverse, randomForest, caret), Logistic Regression, ROC/AUC Analysis

BI & Delivery Layer: Power BI, Tableau, Streamlit, Plotly, MS Excel, Self-serve Analytics, Executive Dashboards

Operations & Collaboration: KPI Ownership, RCA / Incident Investigation, Stakeholder Management, Cross-functional Data Validation, Agile
