Hiring Team

Bain Capability Network (BCN) - ORG CoE

New Delhi, India

Re: Analytics - ORG CoE, BCN

I am applying for the ORG CoE analytics role at BCN. My qualification path: MBA (PGPM Operations Management, ICFAI Business School Mumbai, 2025) + 1.5 years of analytics experience -- the post-graduate 12-month track.

The requirement I want to address first: **"Demonstrated experience leveraging GenAI / AI-enabled workflows to solve business problems and improve productivity."** I built **career-ops** -- a production AI system running on Claude (Anthropic's LLM) + Python + Node.js that automates my entire job-search pipeline: GenAI-driven JD evaluation via prompt engineering, automated PDF CV generation, Gmail API ingestion, and a 200+ application tracker. It runs daily, manages real operations, and saved me 10+ hours per week. This is not a tutorial project -- it is a deployed, maintained system that demonstrates exactly the GenAI workflow thinking the role describes.

On the analytics side: at **Logistics Integrators**, I built Python/SQL analytical workflows, owned Power BI dashboards for senior leadership, and led root-cause analysis that turned into actionable business recommendations. I hold the **Google Advanced Data Analytics Professional Certificate** (7/7, May 2026) and have 9 portfolio projects covering SQL, Python, R, Power BI, and statistical modelling on 1.2M+ records.

I am curious about org diagnostics and benchmarking as an analytical domain -- it is a space where data + human insight create outsized value, which is exactly the kind of problem I find compelling. Open to relocate to New Delhi. Portfolio: github.com/Zolow-kuni/data-portfolio. Happy to connect for a quick call.

Warm regards,

Subham Joshi
