Talent Acquisition Team

BlackRock India

Data Operations Analyst - Aladdin · Mumbai

Dear Hiring Team,

BlackRock's Aladdin platform processes some of the most consequential financial data in the world - and the Data Operations Analyst role is responsible for making sure it flows cleanly, on time, and with full integrity. That's the job I've been doing for the past year at Logistics Integrators, and it's the job I want to keep doing at a much higher level of consequence.

In my current role, I own **data pipeline monitoring, SLA management, and data quality validation** on 180K+ operational order records. I built SQL-based threshold alerting and statistical anomaly detection that surfaces data quality issues before they reach downstream reporting - the same proactive pattern BlackRock requires for Aladdin's data pipeline operations. I maintain structured ETL audit logs, perform reconciliation across systems, and lead root-cause analysis with 3-5 cross-functional teams to ship corrective actions. Every reporting cycle ends with 100% data accuracy or it doesn't go out.

My portfolio work reinforces this specifically for financial data: a **10-rule financial data integrity checker** (700 Microsoft financial records, 10/10 rules passed, 14 profit outliers flagged via 3-sigma detection, zero false negatives) and an **automated ETL pipeline with structured audit logging** (version-stamped outputs, single-command execution) both demonstrate the systematic, defensible approach to data quality that operating at BlackRock's scale requires.

My **MBA in Operations Management** (ICFAI Business School, 2025) provides the financial domain context and governance framing to work productively alongside portfolio management and risk teams - I understand what the data is for, not just how to clean it. I am an immediate joiner, open to relocate to Mumbai, and hold no visa requirements.

I'd welcome the opportunity to discuss how my background maps to the Aladdin Data Operations mandate. Happy to connect for a short call.

Yours sincerely,

Subham Joshi
