Blackbaud

Hyderabad, India

Re: Staff Business Analyst - Blackbaud Luminate Online

I am applying for the Staff Business Analyst role on the Luminate Online services team. I am comfortable working EST hours, available immediately, and have a strong track record of independent learning, quality control, and client-facing documentation -- the three things this role is built around.

At **Logistics Integrators Pvt. Ltd.**, I managed recurring scheduled tasks for senior leadership on strict weekly deadlines, wrote internal and client-facing documentation for non-technical stakeholders, and conducted quality control checks on datasets and reporting outputs before delivery. My **BCA background** gives me the HTML/CSS/JavaScript foundations needed to configure and support a web-based fundraising platform like Luminate -- I understand how web content, email campaigns, and form configurations work without needing to be a developer. I also hold **three LinkedIn Learning certifications in software testing** (Test Planning, Tools, Selenium) -- demonstrating the QC testing mindset the role requires.

I am a self-motivated, independent learner -- I taught myself Python, SQL, Power BI, and dbt through self-directed study while working full-time, earning 15 certifications. Learning the Luminate Online platform end-to-end is exactly the kind of challenge I take on and own.

Happy to connect for a quick call. Portfolio: github.com/Zolow-kuni/data-portfolio

Warm regards,

Subham Joshi
