Dehradun, India

PROFESSIONAL SUMMARY

Data Analyst with ~1.5 years of hands-on experience owning data integrity, data quality, and dashboard reporting across cross-functional teams in logistics and operations contexts — using SQL, PostgreSQL, Python (Pandas), Power BI, dbt, and Excel to turn raw, messy datasets into trusted, single-source-of-truth reporting. Skilled at building self-serve BI dashboards, running validation/reconciliation/ETL audits that eliminate reporting discrepancies, and translating technical findings into clear, actionable insights for non-technical stakeholders. Backed by 9 end-to-end portfolio projects (1.2M+ records) including a 10-rule data-integrity validation engine and automated ETL pipelines. **Google Advanced Data Analytics Certified** (full 7-of-7 Professional Certificate) — 15 certifications in total.

CORE COMPETENCIES

Data Quality & Data Integrity

ETL Validation & Data Transformation (dbt, ELT)

BI Dashboard Development (Power BI — transferable to Qlik Sense)

Data Reconciliation & Validation

Cross-functional / Agile Collaboration

KPI Tracking & Operational Reporting

SQL & Python (Pandas, NumPy)

Stakeholder Communication (Non-technical Audiences)

WORK EXPERIENCE

Logistics Integrators Pvt. Ltd. Mar 2025 – Mar 2026

Data Analyst (Management Trainee Program)

Dehradun, India

- Drove data quality and data integrity workflows — validation, reconciliation, ETL audit — eliminating reporting discrepancies and establishing a trusted single source of truth across reporting systems
- Owned weekly BI dashboards in Power BI tracking 10+ business KPIs across freight operations, serving as the data custodian for cross-team reporting (directly transferable to Qlik Sense / Salesforce reporting environments)
- Built SQL-based statistical anomaly detection and threshold-based alerting on operational and sales datasets, surfacing data-health issues before they impacted SLAs
- Designed conversion, funnel, and drop-off analysis across the customer/shipment journey (start-to-delivery) — the same lifecycle-stage thinking that maps onto SaaS customer/renewal funnels
- Led root-cause analysis (RCA) on performance spikes, partnering with 3–5 cross-functional teams (effectively “internal customers”) to validate data and ship corrective actions
- Automated recurring reporting workflows and ETL/ELT pipelines in Python (Pandas, NumPy, dbt), reducing manual effort and improving turnaround on weekly business reviews

Vrun Minerals Pvt. Ltd. Feb 2024 – Jul 2024

Operations Analyst (Intern)

Dehradun, India

- Cleaned and validated distributor and sales datasets using Excel and Python (Pandas); ran inventory reconciliation and data-accuracy checks across daily operations — reducing reporting errors and improving data health visibility
- Documented data workflows and measurement requirements, translating technical metric definitions into plain language for non-technical stakeholders
- Conducted business trend analysis to generate actionable insights for supply-chain decisions

PROJECTS

Portfolio 1 — Python Analytics · [github.com/Zolow-kuni/data-portfolio](#)
Financial Data Integrity Checker · Python · Pandas · NumPy · Matplotlib [GitHub](#)
Engineered a 10-rule data-quality validation engine on 700 real financial records — acting as data custodian: 10/10 rules passed, 14 profit outliers flagged via 3-sigma detection, completeness scored 91–100% per column

Interactive KPI Dashboard · Python · Streamlit · Plotly · Pandas [GitHub](#)
Built a live multi-department dashboard tracking 6 KPIs (on-time delivery, revenue, profit margin) across 180,519 real supply-chain orders; surfaced a 40.9% on-time delivery rate via automated data-health alerting

Portfolio 2 — SQL · Power BI · R · [github.com/Zolow-kuni/data-portfolio-2](#)
Python Automation Pipeline (ETL) · Python · Pandas · openpyxl · logging [GitHub](#)
Built an end-to-end automated ETL pipeline — ingest, clean, validate, analyse, and generate a 5-sheet formatted Excel report with timestamps; achieved a 100% data-quality score with single-command execution

Power BI Customer Churn Dashboard · Python · Power BI · DAX [GitHub](#)
Cleaned 10,000 customer records (zero nulls); built a 3-page Power BI dashboard with DAX measures tracking a 20.4% churn rate across demographics, credit-score bands, and balance segments — a customer-data & lifecycle analysis analog

EDUCATION

MBA / PGPM — Operations Management 2025 · CGPA 6.83
[ICFAI Business School, Mumbai](#)
Focus: data-driven decision making, process optimization, and performance analytics.

Bachelor of Computer Applications (BCA) 2022 · 72.68%
[Shree Guru Ram Rai I.T.S., Dehradun](#)
Foundation in programming (Java, Python), relational databases (SQL), and analytical problem solving.

CERTIFICATIONS

Google Advanced Data Analytics Professional Certificate (7-course program)	Google / Coursera	2026
SQL and PostgreSQL: The Complete Developer's Guide (22 hrs)	Udemy	2026
Mastering dbt (Data Build Tool) — Beginner to Pro (8 hrs)	Udemy	2026
Data Analysis Using Python	IBM / Credly	2026

SKILLS

Data Quality & Integrity: Data Quality, Data Integrity, Data Validation, Reconciliation, ETL Audit, Data Health Metrics, Root Cause Analysis
SQL & Python: SQL (joins, window functions, CTEs, aggregations), PostgreSQL, SQLite, Python (Pandas, NumPy, openpyxl), Statistical Analysis, Outlier Detection
ETL & Analytics Engineering: dbt (dbt Core), ELT Pipelines, ETL Validation, Data Transformation, Process Automation
BI & Dashboards: Power BI, Qlik Sense (transferable from Power BI), Tableau, MS Excel (Pivot Tables, Modeling), BI Dashboard Development, Self-serve Analytics, Executive Reporting
Customer & Lifecycle Analytics: Funnel Analytics, Conversion Analysis, Cohort Analysis, Drop-off Investigation, Customer Journey Mapping, KPI Tracking
Collaboration: Stakeholder Management, Cross-functional Data Validation, Agile, Non-technical Communication, Technical Documentation
