To: Umang, Legpro Solutions

Re: Junior Data Entry & Analyst - Odisha

Dear Umang,

I am applying for the Junior Data Entry & Analyst position at Legpro Solutions.

I have 1.5 years of post-MBA experience doing exactly the work you have described: daily data entry and validation across operational datasets, MIS preparation and weekly performance summaries for cross-functional teams, audit documentation and reconciliation, and coordination with operations teams to consolidate and clean reporting data.

At Logistics Integrators I maintained MIS reports covering 10+ KPIs, built Excel and Power BI dashboards for operational and production reporting, and owned data-accuracy checks that kept the reporting pipeline discrepancy-free. Process documentation and structured root-cause analysis on data gaps are part of my day-to-day.

My primary tools are MS Excel (pivot tables, advanced formulas, data modelling) and SQL. I do not have SAP hands-on experience yet, but I am familiar with ERP data workflows and will ramp quickly with on-the-job exposure.

I hold an MBA in Operations Management (ICFAI Business School, Mumbai, 2025) and a BCA (2022). I am based in Dehradun and open to relocating to Odisha for this role.

Please find my resume attached. Happy to connect over a call at your convenience.

Warm regards,

Subham Joshi
