SUBHAM JOSHI

DATA OPERATIONS ANALYST | SQL | PYTHON | POWER BI | SOFTWARE TESTING | AGILE | MBA – OPERATIONS MANAGEMENT

Summary

Data Operations Analyst with MBA in Operations Management and experience in data analytics, dashboard development, and sales & operations reporting within international export-import logistics. Proficient in SQL, Python, MS Excel, and Power BI for KPI tracking, data validation, and translating stakeholder needs into data-driven insights across cross-functional teams. Agile-certified with a strong foundation in software design and end-to-end data operations.

Experience

Management Trainee – Operations & Sales Support | Logistics Integrators Pvt. Ltd.

Delhi | Mar 2025 – Mar 2026

- Analyzed operational and sales datasets in Excel and SQL to support export-import decision-making across ocean freight, air freight, and customs operations.
- Produced weekly dashboards tracking 10+ KPIs, coordinating with 3–5 cross-functional teams (sales, operations, compliance) to ensure data integrity and reporting accuracy.
- Conducted root cause analysis to identify delays and improve turnaround time on international shipments.

Operations Intern – Data & Process Support | Vrun Minerals Pvt. Ltd.

Mumbai | Feb 2024 – Jul 2024

- Collected, cleaned, and structured distributor, retailer, and sales datasets for operational and sales performance analysis, ensuring data quality and integrity.
- Built Excel dashboards and visualizations for business reporting; documented data requirements and workflow mapping to improve processes.
- Tracked raw materials and finished goods inventory; coordinated daily operations to ensure smooth workflow.

Python Developer | Asyva Infotech

Dehradun | Nov 2022 – Jun 2023

- Developed Python scripts and ETL pipelines for data processing, analytics, and automation using pandas and NumPy.
- Contributed to cloud and BI projects, enabling scalable analytics and AI-powered data solutions.

Software Tester | Arohar Technologies Pvt. Ltd.

Dehradun | Mar 2022 – Oct 2022

- Executed manual and functional testing of web-based products, ensuring TaxSo met GST compliance and user requirements.
- Documented and tracked defects across test cycles; collaborated with developers to verify fixes and validate software behavior.
