PROFESSIONAL SUMMARY

Data Analyst with ~1.5 years owning reporting, dashboards, and metric definitions end-to-end - and a builder who works fluently with AI tooling to scale routine analysis and spend more time on interpretation. Designed and shipped **career-ops, a full automation system built hands-on with an AI coding agent** (YAML config, hooks, Playwright pipelines, bidirectional sync), proof that "AI-augmented workflows" is something I practice, not just claim. Strong in SQL (window functions, CTEs, RFM/cohort analysis), Python (Pandas, NumPy), dbt-based data modeling, and BI dashboarding (Power BI, Tableau) - the same SQL-first, self-serve design discipline Looker is built around. Known for translating ambiguous questions into clear analyses and owning the "single source of truth" for the metrics I support.

CORE COMPETENCIES

AI-Augmented Analytics Workflows

SQL (Window Fns, CTEs, Self-serve Models)

Metric Design & Ownership

Python (Pandas, NumPy)

dbt & Data Modeling

BI Dashboarding (Power BI, Tableau, Looker-ready)

Stakeholder Translation

Data Quality & Definitions

Experimentation & Cohort Analysis

Business Judgment

Clear Written/Verbal Communication

Self-Directed Learning

EXPERIENCE

Logistics Integrators Pvt. Ltd.

Mar 2025 - Mar 2026

Data Analyst (Management Trainee Program)

Dehradun, India

- Owned metric definitions and data quality for 10+ business KPIs across freight operations - established the single source of truth that cross-team reporting relied on, eliminating conflicting numbers
- Built **Power BI dashboards and self-serve SQL reporting infrastructure**, designing for the same SQL-first, model-driven approach that underlies Looker-style BI
- Translated ambiguous business questions into clear analyses - led root-cause investigations on performance anomalies, partnering with 3-5 cross-functional teams to turn findings into decisions and corrective actions
- Wrote **complex SQL** for statistical anomaly detection and threshold-based alerting, surfacing outliers before they impacted SLAs
- Automated recurring reporting in **Python (Pandas, NumPy)** - scaling the routine work so more time went into interpretation and recommendations, not repeated pulls

Vrun Minerals Pvt. Ltd.

Feb 2024 - Jul 2024

Operations Analyst (Intern)

Dehradun, India

- Built dashboards with deviation flagging on inventory and sales trends in Excel and Python (Pandas); supported decisions with clear, business-facing analysis
- Performed reconciliation and daily data-accuracy checks, reducing reporting errors and improving trust in the numbers
- Documented data workflows and metric definitions in plain language for non-technical stakeholders

PROJECTS

career-ops - Personal Job-Search Operating System

Node.js · Claude Code (AI Agent) · YAML · Playwright

Built a **production system from zero to one, working hands-on with an AI coding agent** - a YAML-config-driven automation OS with hooks, Playwright-based PDF pipelines, and bidirectional database sync; auto-synced 33 application records in a single batch and manages 15 certifications under one source of truth. Direct, demonstrated proof of fluency with AI-augmented workflows - not a claimed skill, a shipped one

SQL Retail Analysis

SQL · SQLite · Python

Modeled and loaded 805,549 rows from 525,461 raw e-commerce transactions into SQLite; wrote **15 advanced SQL queries** - window functions, CTEs, RFM segmentation, cohort retention, MoM growth via LAG() - across 5,878 customers in 41 countries

Power BI Customer Churn Dashboard

Python · Power BI · DAX

Cleaned 10,000 customer records to zero nulls; built a **3-page self-serve dashboard with DAX measures** tracking a 20.4% churn rate across demographics, credit-score bands, and balance segments - designed for stakeholders to explore on their own

EDUCATION

MBA / PGPM - Operations Management · ICAI Business School, Mumbai2025 · CGPA 6.83

Focus: data-driven decision making, process optimization, and translating analysis into business action.

Bachelor of Computer Applications (BCA) · Shree Guru Ram Rai I.T.S., Dehradun2022 · 72.68%

Foundation in programming (Java, Python), relational databases (SQL), and analytical problem solving.

CERTIFICATIONS

Google Advanced Data Analytics Professional Certificate (7-course program)Google / Coursera2026

2025 Mastering dbt (Data Build Tool) - From Beginner to Pro (8 hrs)Udemy2026

SQL and PostgreSQL: The Complete Developer's Guide (22 hrs)Udemy2026

SKILLS

SQL & Python: SQL (joins, window functions, CTEs, aggregations), PostgreSQL, SQLite, Python (Pandas, NumPy), Statistical Analysis, Cohort Analysis, Outlier Detection

Data Modeling & Engineering: dbt Core, ELT/ETL Pipelines, Data Transformation, Schema Design, Data Quality, Data Integrity

BI & Visualization: Power BI (DAX, Modeling), Tableau, Self-serve Dashboard Design, Executive Reporting

AI & Automation: AI-Augmented Workflows, Process Automation, Claude Code / AI Coding Agents, Workflow Design

Collaboration: Stakeholder Management, Data Storytelling, Non-technical Communication, Agile
