

Referral Note — Subham Joshi

For **JMAN Group** — via Rishabh Saklani (Software Engineer, JMAN Chennai)

THE ASK

Hey Rishabh — thanks again for offering to refer me 🙏

This doc has three things you might find handy:

- A **ready-to-paste candidate pitch** for JMAN's referral form
- My **contact card** at a glance
- A note on which roles I'm best fit for, so you can route me correctly

My CV is attached separately as Subham-Joshi-Resume-JMAN.pdf.

1-PARAGRAPH PITCH (COPY-PASTE READY)

PASTE THIS INTO JMAN'S REFERRAL FORM — ~155 WORDS

Subham Joshi is a Data Analyst with ~1.5 years of hands-on experience building data pipelines that drive operational decisions — anomaly monitoring that surfaced SLA risks at Logistics Integrators, KPI dashboards trusted at the leadership level, and reporting automation that returned analyst capacity to higher-value modelling work. He is comfortable across the modern data stack (SQL, dbt, PostgreSQL, Python, Power BI, Tableau) with a 9-project portfolio on 1.2M+ real records covering churn-risk modelling (AUC 0.837 on 7K telco customers), automated fraud-scoring (284K credit-card transactions), and customer-segmentation cohorts on 805K transactions. He just completed Google's Advanced Data Analytics Professional Certificate (full 7-course program, May 2026), holds a Mastering dbt certification, and brings an MBA in Operations Management (ICFAI Mumbai 2025) for commercial translation. Open to Chennai relocation, immediately available.

BEST-FIT ROLES AT JMAN

If you can route me toward any of these (or comparable Associate / Junior / Analyst level openings), that would be the strongest fit:

- **Associate Consultant — Data Analytics** (entry track)
- **Junior Data Analyst / Data Consulting Analyst**
- **Data Engineer** (Associate level) — if there's a Chennai opening at 1-3 yrs experience
- **Graduate Trainee Program** if it's still open in Chennai

Senior Consultant / Architect / Lead Engineer postings are above my exp band — please skip those.
