Hiring Team

Benchmarks & Indices Operations — Equity Index Data Management (EIDM)

London Stock Exchange Group (LSEG)

Bengaluru, Karnataka, India

Re: Application for Equity Index Data Analyst — Bengaluru (Hybrid)

Dear Hiring Team,

I am writing to apply for the **Equity Index Data Analyst** position with the EIDM team in Bengaluru. The role's emphasis on **data quality, accuracy, root cause analysis, and SOP-driven workflows** on reference equity data maps directly to the discipline I have built over the last ~1.5 years owning data integrity at Logistics Integrators.

At Logistics Integrators, I drove validation, reconciliation, and ETL audit workflows that eliminated reporting discrepancies across freight datasets, and led RCA on operational anomalies in collaboration with 3–5 cross-functional teams. I documented SOPs aligned to risk and governance guidelines, performed quality control on peer outputs, and built SQL-based statistical anomaly detection on reference data — qualities that mirror EIDM's policy compliance, peer review, and rebalance cycle work. My portfolio also includes a **financial data integrity validation engine on 700 real Microsoft financial records**, with 10 validation rules and 3-sigma outlier detection — built specifically to practise the discipline EIDM cares about.

My MBA in Operations Management (ICFAI Business School Mumbai, 2025) and the **Google Advanced Data Analytics Professional Certificate** completed in May 2026 (full 7-course program covering EDA, statistics, regression, ML, and capstone) round out my analytical foundation. I am a daily user of Microsoft Copilot, ChatGPT, and Gemini for primary research and validation, which aligns with EIDM's beginner-level AI tools expectation. While equity reference data is new to me, the underlying data-quality discipline, structured policy interpretation, and SOP authoring transfer directly — and the 1+ years of capital-markets adjacent analytical work I have done sits well above the role's minimum.

I would welcome the chance to bring this discipline to LSEG's Benchmarks & Indices Operations. I am immediately available, based in Dehradun, and willing to relocate to Bengaluru on the team's preferred start date. I can be reached at joshisubham442@gmail.com.

Sincerely,

Subham Joshi
