Dehradun, India (Remote)

## PROFESSIONAL SUMMARY

Data Analyst with ~1.5 years of hands-on experience in SQL, Python (Pandas, NumPy), automation, and data operations — building self-serve BI dashboards, automating recurring reporting workflows, and running root-cause investigations across cross-functional teams in fast-moving operations environments. Comfortable owning the full loop from messy raw data to production-ready automation: query optimization, ETL/ELT pipelines (dbt), threshold-based alerting, and Python scripts that remove manual effort from weekly reviews. Personally built and customized an agentic, YAML-config-driven job-search operating system on Claude Code — orchestrating automated pipelines, hooks, and API integrations end-to-end. Backed by 9 end-to-end portfolio projects (1.2M+ records) and **Google Advanced Data Analytics Certified** (7-of-7 Professional Certificate) — 15 certifications in total.

## CORE COMPETENCIES

SQL (Joins, Aggregations, Performance Tuning)

Python for Data Processing & Automation (Pandas, NumPy, APIs)

Workflow & Reporting Automation

Data Operations & ETL/ELT Pipelines (dbt)

Operational & Product Dashboards (Power BI)

Process Bottleneck Analysis & RCA

Agentic / AI-Ops Tooling (Claude Code, API Integrations)

Cross-functional Collaboration (Agile)

## WORK EXPERIENCE

**Logistics Integrators Pvt. Ltd.** Mar 2025 – Mar 2026

### Data Analyst (Management Trainee Program)

Dehradun, India

- Automated recurring reporting workflows and data transformations in Python (Pandas, NumPy), removing manual effort and shortening turnaround on weekly business reviews — the same automate-the-boring-stuff mindset this role calls for
- Built SQL-based statistical anomaly detection and threshold-based alerting on operational and sales datasets (joins, aggregations, query optimization), surfacing outliers and bottlenecks before they impacted SLAs
- Owned weekly BI dashboards in Power BI tracking 10+ business KPIs across freight operations — building and maintaining the operational/product-insight dashboards a small team relies on daily
- Led root-cause analysis (RCA) on performance spikes — shipment delays, turnaround drops, cost overruns — analyzing business processes and data flow to identify and fix recurring operational bottlenecks
- Drove data quality and data integrity workflows: validation, reconciliation, ETL/ELT audit (dbt) — eliminating reporting discrepancies and building scalable, repeatable solutions
- Partnered with 3–5 cross-functional teams to validate data and ship corrective actions in an Agile, fast-paced operating environment

**Vrun Minerals Pvt. Ltd.** Feb 2024 – Jul 2024

### Operations Analyst (Intern)

Dehradun, India

- Cleaned and validated distributor and sales datasets using Excel and Python (Pandas); built dashboards with deviation highlighting on inventory and sales trends
- Performed inventory reconciliation and data-accuracy checks across daily operations, reducing reporting errors and improving operational visibility
- Conducted business-process trend analysis to surface improvement opportunities for supply-chain decisions

PROJECTS

Personal Systems & Automation  
career-ops — Personal Job-Search Operating System · Node.js · Claude Code · YAML · Playwright · APIs  
Built and customized a YAML-config-driven, agentic automation OS — auto-syncing data across systems via hooks, generating ATS-optimized PDFs through a Playwright pipeline, evaluating inputs against a 6-archetype scoring rubric, and mirroring a 360+ entry tracker into a synced database; 33 entries auto-processed in a single batch. Direct, hands-on experience building the kind of OPS AI agents and automation tooling this role is centered on.

Portfolio 2 — SQL · Power BI · R · [github.com/Zolow-kuni/data-portfolio-2](#)  
SQL Retail Analysis · SQL · SQLite · Python [GitHub](#)  
Loaded 805,549 rows into SQLite and wrote 15 advanced, performance-tuned queries — window functions, CTEs, RFM segmentation, cohort retention, MoM growth via LAG() — across 5,878 customers in 41 countries

Python Automation Pipeline · Python · Pandas · openpyxl · logging [GitHub](#)  
Built an end-to-end automated pipeline — ingest, clean, validate, analyse, and generate a 5-sheet formatted Excel report with timestamps; 100% data-quality score, single-command execution, zero manual touch points

Portfolio 1 — Python Analytics · [github.com/Zolow-kuni/data-portfolio](#)  
Interactive KPI Dashboard · Python · Streamlit · Plotly · Pandas [GitHub](#)  
Built a live multi-department dashboard tracking 6 KPIs across 180,519 supply-chain orders; surfaced a 40.9% on-time delivery rate via automated alerting across 11 departments and 36 months

EDUCATION

**MBA / PGPM — Operations Management** 2025 · CGPA 6.83  
[ICFAI Business School, Mumbai](#)  
Focus: data-driven decision making, process optimization, and performance analytics.

**Bachelor of Computer Applications (BCA)** 2022 · 72.68%  
[Shree Guru Ram Rai I.T.S., Dehradun](#)  
Foundation in programming (Java, Python), relational databases (SQL), and analytical problem solving.

| Data Analysis Using Python                                                 | <a href="#">IBM / Credly</a>      | 2026 |

SKILLS

**SQL & Databases:** SQL (joins, aggregations, window functions, CTEs, query/performance tuning), PostgreSQL, SQLite  
**Python & Automation:** Python (Pandas, NumPy, openpyxl), API integrations, workflow automation, process automation, agentic tooling (Claude Code, hooks, YAML configs)  
**Data Operations & ETL:** dbt (dbt Core), ELT Pipelines, ETL Validation, Data Quality, Data Integrity, Data Transformation  
**BI & Dashboards:** Power BI, Tableau, Streamlit, Plotly, MS Excel (Pivot Tables, Modeling), Self-serve Analytics, Operational/Product Dashboards  
**Operations Analytics:** KPI Tracking, RCA / Incident Investigation, Process Bottleneck Analysis, Threshold-based Alerting, Conversion & Funnel Analysis  
**Collaboration & Tooling:** Git / Version Control (GitHub — active portfolio repos), Stakeholder Management, Cross-functional Validation, Agile, Non-technical Communication
