Dehradun, India · Open to remote (India)

PROFESSIONAL SUMMARY

Operations-minded analyst with ~1.5 years in a fast-paced, SLA-driven logistics environment - owning root-cause investigations, cross-team coordination, and the reporting layer that kept teams aligned on the same numbers. Genuinely curious about data and the financial industry: built a **Fraud & Anomaly Detection System** on 283,726 real credit-card transactions in personal time, applying statistical risk-scoring to flag suspicious activity at real-world prevalence rates - proof of interest backed by shipped work, not a stated preference. Comfortable in SQL (window functions, CTEs, aggregations) and Python (Pandas, NumPy) - both ahead of where this role lists them as nice-to-have. MBA (Operations Management) plus a builder's habit of self-directing 9 portfolio projects across 1.2M+ records outside of work.

CORE COMPETENCIES

Fast-Paced Operations Execution

Cross-Functional Problem-Solving

Root-Cause Analysis (RCA)

Fraud & Risk Analysis (Self-Directed)

Process Ownership

SQL (Window Fns, CTEs, Aggregations)

Python (Pandas, NumPy)

KPI Tracking & Reporting

Stakeholder Coordination

Data Integrity & Validation

Self-Directed Learning

Natural Curiosity

EXPERIENCE

Logistics Integrators Pvt. Ltd.

Mar 2025 - Mar 2026

Data Analyst (Management Trainee Program)

Dehradun, India

- Led **root-cause investigations** on shipment delays, turnaround drops, and cost overruns under live SLA pressure - partnering with 3-5 cross-functional teams to validate findings and ship corrective actions
- Owned weekly KPI dashboards tracking 10+ metrics across freight operations, becoming the **single trusted source of truth** that cross-team reporting relied on under continuous time pressure
- Built **SQL-based statistical anomaly detection and threshold alerting** on operational and sales data, surfacing outliers before they became SLA breaches
- Drove data quality, validation, and reconciliation workflows across reporting systems - eliminating discrepancies that had previously eroded team trust in the numbers
- Automated recurring reporting in **Python (Pandas, NumPy)**, freeing up time for root-cause work and stakeholder coordination over repeat manual pulls

Vrun Minerals Pvt. Ltd.

Feb 2024 - Jul 2024

Operations Analyst (Intern)

Dehradun, India

- Performed **inventory reconciliation and daily data-accuracy checks** across operations, reducing reporting errors and improving stock visibility under fast-turnaround conditions
- Cleaned and validated distributor and sales datasets in Excel and Python (Pandas); built deviation-flagging dashboards to surface issues early
- Conducted business trend analysis to generate actionable insights for time-sensitive supply-chain decisions

PROJECTS

Fraud & Anomaly Detection System

Python · Pandas · NumPy · SciPy · Scikit-learn

Self-directed project applying **Z-score, IQR, and rule-based risk scoring (0-100)** to 283,726 real European credit-card transactions; flagged 2,838 suspicious records at a 0.17% rate matching real-world fraud prevalence - built purely out of genuine interest in the financial industry and fincrime analytics, not as a course requirement

Interactive KPI Dashboard

Python · Streamlit · Plotly · Pandas

Built a live multi-department dashboard tracking 6 operational KPIs (on-time delivery, revenue, profit margin, delay days) across 180,519 real supply-chain orders; surfaced a 40.9% on-time delivery rate through automated alerting - the same kind of fast-feedback operational visibility this role depends on

Financial Data Integrity Checker

Python · Pandas · NumPy · Matplotlib

Engineered a 10-rule validation engine on 700 real Microsoft financial records; all 10 rules passed, 14 profit outliers flagged via 3-sigma detection - direct, hands-on practice with the kind of data-integrity rigor financial operations functions depend on

EDUCATION

MBA / PGPM - Operations Management · ICFAI Business School, Mumbai

2025 · CGPA 6.83

Focus: data-driven decision making, process optimization, and performance analytics - directly aligned with operations execution at scale.

Bachelor of Computer Applications (BCA) · Shree Guru Ram Rai I.T.S., Dehradun

2022 · 72.68%

Foundation in programming (Java, Python), relational databases (SQL), and analytical problem solving.

CERTIFICATIONS

Google Advanced Data Analytics Professional Certificate (7-course program)	Google / Coursera	2026
SQL and PostgreSQL: The Complete Developer's Guide (22 hrs)	Udemy	2026
Data Analysis Using Python	IBM / Credly	2026

SKILLS

- Operations & Problem-Solving:** Root-Cause Analysis, Cross-Functional Coordination, Process Ownership, KPI Tracking, SLA Management, Conversion & Drop-off Analysis
- SQL & Python:** SQL (joins, window functions, CTEs, aggregations), PostgreSQL, SQLite, Python (Pandas, NumPy), Statistical Analysis, Outlier Detection
- Risk & Data Integrity:** Fraud/Anomaly Detection, Rule-Based Risk Scoring, Data Validation, Reconciliation, ETL Audit
- Reporting & Visualization:** Power BI, Tableau, Excel (Pivot Tables, Modeling), Dashboard Development
- Collaboration:** Stakeholder Management, Data Storytelling, Non-technical Communication, Agile
