Dehradun, India · Open to remote (India)

PROFESSIONAL SUMMARY

Data Analyst with ~1.5 years building anomaly-detection logic, automated workflows, and root-cause investigations in fast-paced operations environments - including a fraud and anomaly-detection engine applying Z-score, IQR, and rule-based risk scoring to 283,000+ real transactions, flagging suspicious records at a 0.17% rate. Skilled in SQL and Python, with a track record of eliminating manual friction through end-to-end automated solutions, owning data integrity across cross-functional teams, and building scalable reporting systems from the ground up. MBA in Operations Management adds structured thinking to process design and stakeholder alignment.

CORE COMPETENCIES

Anomaly & Fraud Detection

SQL & Python (Pandas, NumPy)

Process Automation

Root Cause Analysis

Data Integrity & Governance

Scalable Workflow Design

Risk & Threshold Scoring

Cross-functional Collaboration

KPI & Metrics Ownership

Power BI & Reporting Infrastructure

Fast-paced Operations

MBA - Operations Management

EXPERIENCE

Logistics Integrators Pvt. Ltd.

Mar 2025 - Mar 2026

Data Analyst (Management Trainee Program)

Dehradun, India

- Built **SQL-based statistical anomaly detection and threshold-based alerting** on operational and sales datasets, surfacing outliers before they impacted SLAs - the same signal-detection pattern FinCrime monitoring runs on
- Owned root-cause investigations **end-to-end**, partnering with 3-5 cross-functional teams to validate data, diagnose anomalies, and ship corrective actions - driving complex projects from insight through resolution
- Eliminated manual friction with end-to-end automated solutions**: built Python (Pandas, NumPy) pipelines that automated recurring reporting workflows, reducing manual effort and improving turnaround on weekly business reviews
- Drove **data integrity and governance workflows** - validation, reconciliation, ETL audit - establishing a single source of truth and eliminating reporting discrepancies across systems
- Owned weekly Power BI dashboards tracking 10+ business KPIs across freight operations, designing **scalable processes** for cross-team reporting

Vrun Minerals Pvt. Ltd.

Feb 2024 - Jul 2024

Operations Analyst (Intern)

Dehradun, India

- Cleaned and validated distributor and sales datasets using Excel and Python (Pandas); built **deviation-flagging dashboards** on inventory and sales trends - early threshold-based monitoring work
- Performed inventory reconciliation and daily data-accuracy checks, reducing reporting errors and improving operational visibility
- Documented data workflows and measurement definitions, improving transparency of metrics for non-technical stakeholders

PROJECTS

Fraud & Anomaly Detection System

Python · Pandas · NumPy · SciPy · Scikit-learn

Applied **Z-score, IQR, and rule-based risk scoring (0-100)** to 283,726 real European credit-card transactions; flagged 2,838 suspicious records at a 0.17% fraud rate matching the dataset's known prevalence - a layered statistical + rule-based detection approach directly applicable to financial-crime monitoring

career-ops - Personal Job-Search Operating System

Node.js · Claude Code · YAML · Playwright

Built a **system from zero to one**: a YAML-config-driven automation OS with hooks, Playwright-based PDF pipelines, and bidirectional database sync - auto-syncing 33 application records in a single batch and managing 15 certifications under a single source of truth

Financial Data Integrity Checker

Python · Pandas · NumPy · Matplotlib

Engineered a **10-rule validation engine** on 700 real Microsoft financial records; 10/10 rules passed, 14 profit outliers flagged via 3-sigma detection, completeness scored 91-100% per column

EDUCATION

MBA / PGPM - Operations Management · ICFAI Business School, Mumbai 2025 · CGPA 6.83

Focus: data-driven decision making, process optimization, and performance analytics - structured thinking applied to scalable process design.

Bachelor of Computer Applications (BCA) · Shree Guru Ram Rai I.T.S., Dehradun 2022 · 72.68%

Foundation in programming (Java, Python), relational databases (SQL), and analytical problem solving.

CERTIFICATIONS

Google Advanced Data Analytics Professional Certificate (7-course program) Google / Coursera 2026

SQL and PostgreSQL: The Complete Developer's Guide (22 hrs) Udemy 2026

Data Analysis Using Python IBM / Credly 2026

SKILLS

SQL & Python: SQL (joins, window functions, CTEs, aggregations), PostgreSQL, Python (Pandas, NumPy), Statistical Analysis, Outlier & Anomaly Detection, Risk Scoring

Process & Automation: Process Automation, Scalable Workflow Design, Root Cause Analysis, Threshold-based Alerting, Signal Monitoring, Incident Investigation

Data Governance: Data Quality, Data Integrity, ETL Validation, Reconciliation, Data Storytelling

BI & Reporting: Power BI, MS Excel (Pivot Tables, Modeling), Dashboard Development, Executive Reporting, Self-serve Analytics

Collaboration: Stakeholder Management, Cross-functional Coordination, Non-technical Communication, Agile
