PROFESSIONAL SUMMARY

Data Analyst with ~1.5 years building data pipelines and dashboards that turn structured and unstructured data (SQL, CSV, JSON) into decisions - running EDA, statistical anomaly detection, and root-cause investigations in real operations contexts. Comfortable across Python (Pandas, NumPy), SQL/PostgreSQL, Power BI, Tableau, and APIs, with hands-on exposure to AI/ML-adjacent tooling: built and run an LLM-driven automation system (career-ops) that uses Claude Code to parse, score, and generate content across a 100+ application pipeline. Backed by 9 end-to-end portfolio projects across the analytics stack on 1.2M+ records - including an automated ingest-clean-validate-report pipeline, SQL segmentation and cohort analysis, and dashboard work tied directly to business outcomes. Google Advanced Data Analytics Certified (full 7-of-7 Professional Certificate, May 2026), with 15 certifications in total.

CORE COMPETENCIES

Data Pipelines & Automation

SQL & Structured/Unstructured Data

Python (Pandas, NumPy)

Exploratory Data Analysis (EDA)

Dashboard Development & Visualization

APIs & Data-Driven Applications

LLM-Assisted Automation (AI/ML Exposure)

Cross-Functional & Client-Style Communication

WORK EXPERIENCE

Logistics Integrators Pvt. Ltd. Mar 2025 - Mar 2026

Data Analyst (Management Trainee Program)

Dehradun, India

- Automated recurring reporting workflows in Python (Pandas, NumPy) - building the kind of repeatable data pipelines that turn raw structured data into ready-to-use reports, cutting manual effort and improving turnaround on weekly business reviews
- Built SQL-based statistical anomaly detection and threshold-based alerting on operational and sales datasets - going beyond simple data retrieval into analysis, interpretation, and surfacing outliers before they hit SLAs
- Owned weekly Power BI dashboards tracking 10+ business KPIs across freight operations - designing the kind of visualization layer that helps teams monitor key metrics day to day
- Led root-cause analysis (RCA) on performance spikes - delays, turnaround drops, cost overruns - converting ambiguous "why is this happening" questions into structured investigations by partnering with 3-5 cross-functional teams to validate data and ship corrective actions
- Designed conversion, funnel, and drop-off analysis on shipment journeys (start-to-delivery), informing operational interventions and process redesigns
- Drove data quality and integrity workflows (validation, reconciliation, ETL audit), ensuring the analysis behind business decisions was built on trustworthy structured data

Vrun Minerals Pvt. Ltd. Feb 2024 - Jul 2024

Operations Analyst (Intern)

Dehradun, India

- Cleaned and validated distributor and sales datasets in Excel and Python (Pandas), then built dashboards with deviation highlighting on inventory and sales trends - translating raw, messy data into visual insight for daily decisions
- Documented data workflows and metrics definitions in plain language for non-technical stakeholders - the same "client interaction" muscle this role calls for, applied cross-functionally
- Performed inventory reconciliation and data accuracy checks across daily operations, taking ownership of data sanity end to end
- Conducted business trend analysis to generate actionable insights supporting supply-chain decisions

PROJECTS

Python Automation Pipeline Data Pipelines · APIs

Built an end-to-end Python pipeline (Pandas, openpyxl, logging) that ingests, cleans, validates, analyses, and reports on 1,000 retail records - single-command execution generating a 5-sheet formatted Excel report with a 100% data quality score; directly demonstrates "building data pipelines" and "data-driven applications" from raw structured data to finished output

Python · Pandas · openpyxl · [github.com/Zolow-kuni/data-portfolio-2](#)

career-ops - Personal Job-Search Operating System AI/ML · LLMs · APIs

Built and customised an LLM-driven automation system using Claude Code, Notion API, Gmail API, and Playwright - parses and scores job descriptions against a 6-archetype rubric, auto-generates tailored content, and mirrors a 147-application tracker into Notion with bidirectional sync (33 entries auto-synced in a single batch); hands-on exposure to working with LLM outputs, APIs, and data-driven applications in a real production pipeline

Node.js · Claude Code · Notion API · Gmail API · Playwright · YAML

SQL Retail Analysis SQL · Structured Data

Cleaned and loaded 805,549 rows from 525,461 raw Online Retail II transactions into SQLite; wrote 15 advanced queries - window functions, CTEs, RFM segmentation, cohort retention, MoM revenue growth via LAG() - surfacing patterns across 5,878 customers in 41 countries; goes well beyond data retrieval into analysis and interpretation

SQL · SQLite · Python · [github.com/Zolow-kuni/data-portfolio-2](#)

Automatidata EDA - NYC Yellow Taxi 2017 EDA · Visualization

Full exploratory data analysis on 408,294 NYC TLC trips; engineered 5 features, applied IQR outlier detection, flagged ~0.5% zero-distance anomalies, and built 4 Python visualisations + a Tableau scatter plot, documenting findings with the PACE framework and an executive summary - turning raw unstructured signal into a clear, actionable insight narrative

Python · Pandas · Tableau · [github.com/Zolow-kuni/data-portfolio](#)

EDUCATION

MBA / PGPM - Operations Management · ICFAI Business School, Mumbai 2025 · CGPA 6.83

Focus areas: data-driven decision making, process optimization, and performance analytics.

Bachelor of Computer Applications (BCA) · Shree Guru Ram Rai I.T.S., Dehradun 2022 · 72.68%

Foundation in programming (Java, Python), relational databases (SQL), and analytical problem solving.

CERTIFICATIONS

🏆 Google Advanced Data Analytics Professional Certificate (7-of-7 courses)	Google / Coursera	May 2026
The Nuts and Bolts of Machine Learning	Google / Coursera	May 2026
SQL and PostgreSQL: The Complete Developer's Guide (22 hrs)	Udemy	May 2026
Python for Data Science	IBM / Credly	Apr 2026
Data Analysis Using Python	IBM / Credly	Mar 2026
Power BI Essential Training	LinkedIn Learning	Mar 2026

SKILLS

SQL & Python: SQL (joins, window functions, CTEs, aggregations), PostgreSQL, SQLite, Python (Pandas, NumPy, openpyxl), Statistical Analysis, Outlier Detection

Data Pipelines & Engineering: ETL/ELT Pipelines, Data Transformation, dbt (dbt Core), Data Quality & Integrity, Process Automation, API Integration

Analysis & AI/ML Exposure: Exploratory Data Analysis (EDA), LLM-assisted Automation, Working with LLM Outputs (career-ops / Claude Code), Statistical Modelling (R), A/B Testing Principles

BI & Visualization: Power BI, Tableau, Streamlit, Plotly, MS Excel (Pivot Tables, Modeling), BI Dashboard Development, Self-serve & Executive Dashboards

Investigation & Operations: RCA / Incident Investigation, KPI Tracking, Metrics Ownership, Cross-functional & Client-style Communication, Data Storytelling

Additional: Java, Manual & API Testing, Agile, Stakeholder Management
