Dehradun, India · Open to relocate

## PROFESSIONAL SUMMARY

Supply chain data analyst with ~1.5 years of hands-on experience analyzing **inventory, logistics, and supply performance datasets** in an operational environment. Proficient in Python (Pandas, NumPy, SciPy), R (regression, random forest, ROC/AUC), SQL, and Power BI -- the exact stack this role requires. Built statistical anomaly detection on supply chain KPIs, owned end-to-end reporting automation pipelines, and tracked inventory turnover, delivery performance, and operational lead times for senior leadership. Backed by 9 portfolio projects across Python, SQL, R, and Power BI on 1.2M+ real records -- including supply chain trend analysis, forecasting-adjacent statistical modelling, and demand segmentation. Holds the **Google Advanced Data Analytics Professional Certificate** (7/7, May 2026). Portfolio: [github.com/Zolow-kuni/data-portfolio](https://github.com/Zolow-kuni/data-portfolio)

## CORE COMPETENCIES

Supply Chain Analytics

Python (Pandas · NumPy · SciPy)

R (Statistical Modelling · Forecasting)

SQL Data Analysis

Power BI KPI Dashboards

Inventory & Demand Analysis

Process Automation & Reporting

Statistical Anomaly Detection

## WORK EXPERIENCE

Logistics Integrators Pvt. Ltd. Mar 2025 - Mar 2026

Data Analyst - Management Trainee Program · Dehradun, India

- Analyzed large datasets on inventory, logistics performance, and supply chain KPIs (inventory turnover, on-time delivery, lead times, cost overruns) using SQL and Python; surfaced actionable insights for planning and operational improvement
- Built statistical anomaly detection and threshold-based alerting on supply performance metrics using Z-score and IQR methods -- flagging deviations before they impacted SLAs
- Owned Power BI dashboards tracking 10+ supply chain KPIs for senior leadership; established the single source of truth for cross-team reporting and performance monitoring
- Designed conversion and funnel analysis on shipment journeys (start-to-delivery) using SQL; detected drop-off patterns and informed operational interventions and process redesigns
- Automated recurring reporting workflows in Python (Pandas), building scalable analytical solutions that reduced manual effort and improved report turnaround
- Led root-cause analysis (RCA) on supply performance gaps -- shipment delays, turnaround drops, cost overruns -- partnering with procurement, operations, and logistics teams

Vrun Minerals Pvt. Ltd. Feb 2024 - Jul 2024

Operations Analyst (Intern) · Dehradun, India

- Cleaned and validated distributor and inventory datasets using Excel and Python; built dashboards with deviation highlighting on stock trends and supply performance
- Performed inventory reconciliation and data accuracy checks, reducing reporting errors and improving stock visibility for supply-chain decisions
- Conducted business trend analysis to generate insights supporting procurement and distribution planning

PROJECTS

Interactive Supply Chain KPI Dashboard Python · Streamlit · Plotly · Power BI

Built a live multi-department dashboard tracking 6 supply chain KPIs (on-time delivery, revenue, profit margin, delay days) across 180,519 real supply chain orders with automated alerting and threshold signals -- directly mirrors the inventory and service-level monitoring this role requires.  
github.com/Zolow-kuni/data-portfolio/tree/main/project2\_kpi\_dashboard

Sales & Inventory Trend Analyzer Python · Pandas · Matplotlib · Seaborn

Analyzed 9,994 real US retail transactions across 3 categories; detected 27 seasonal anomalies, computed MoM growth and 3-month rolling averages, 12.04% overall profit margin. Demonstrates demand trend analysis and forecasting-adjacent statistical techniques applied to real supply data.  
github.com/Zolow-kuni/data-portfolio/tree/main/project4\_sales\_trend\_analyzer

Customer Churn Prediction in R R · tidyverse · randomForest · caret · pROC

Trained 3 ML models on 7,043 records; Logistic Regression AUC 0.837, Random Forest 0.824. Outputs include 8 EDA plots, ROC curves, and feature importance -- demonstrates the R statistical modelling and regression proficiency the JD requires.  
github.com/Zolow-kuni/data-portfolio-2/tree/main/project8\_churn\_prediction\_r

Python Automation Pipeline Python · Pandas · openpyxl · logging

End-to-end automated data pipeline: ingest, clean, validate, analyse, and generate a 5-sheet formatted Excel report on 1,000 retail records; 100% data quality score, single-command execution. Demonstrates "automate data workflows and deliver scalable analytical solutions."

SKILLS

**Python:** Pandas, NumPy, SciPy, Matplotlib, Seaborn, Scikit-learn, openpyxl, Streamlit, Plotly - data manipulation, statistical modelling, visualization, automation

**R:** tidyverse, dplyr, ggplot2, randomForest, caret, pROC - statistical modelling, regression, classification, ROC/AUC analysis

**SQL & BI:** SQL (window functions, CTEs, aggregations), PostgreSQL, SQLite, Power BI (DAX), Tableau, MS Excel (Pivot Tables, Modeling), Operational Dashboards

**Supply Chain Analytics:** KPI Tracking (inventory turnover, lead times, service levels), Demand Trend Analysis, Anomaly Detection, RCA, Process Automation, dbt Core, ETL Validation
