PROFESSIONAL SUMMARY

Analyst with ~1.5 years digging into the *why* behind business and operational performance changes - running root-cause analysis (RCA), funnel and conversion-drop-off investigations, and Power BI dashboard ownership in a logistics/operations setting. Skilled at converting ambiguous business questions into structured analytical investigations, partnering across cross-functional teams to validate data, and communicating findings clearly to non-technical stakeholders. Comfortable across SQL, Python, Power BI, R, and A/B-testing principles, with retail/e-commerce-flavored portfolio work (seasonal trend analysis, RFM segmentation, churn dashboards) on 1.2M+ records. Backed by the Google Advanced Data Analytics Professional Certificate (7-of-7 courses, May 2026) and 9 end-to-end projects spanning the analytics stack.

CORE COMPETENCIES

Root Cause Analysis (RCA)

Funnel & Conversion Analysis

SQL & Structured Investigation

Dashboard Development (Power BI)

Exploratory & Cohort Analysis

A/B Testing Principles

Cross-Functional & Client Communication

Product / Business Analytics

WORK EXPERIENCE

Logistics Integrators Pvt. Ltd. Mar 2025 - Mar 2026

Data Analyst (Management Trainee Program)

Dehradun, India

- Designed conversion, funnel, and drop-off analysis on shipment journeys (start-to-delivery) - investigating exactly the kind of metric and funnel changes that drive operational and business performance - informing interventions and process redesigns
- Led root-cause analysis (RCA) on performance spikes - delays, turnaround drops, cost overruns - converting ambiguous "why is this happening" questions into structured investigations by partnering with 3-5 cross-functional teams to validate data and ship corrective actions
- Owned weekly Power BI dashboards tracking 10+ business KPIs across freight operations, building the single source of truth that teams used to monitor key metrics day to day
- Built SQL-based statistical anomaly detection and threshold-based alerting on operational and sales datasets, surfacing performance-affecting outliers before they hit SLAs
- Drove data quality and integrity workflows (validation, reconciliation, ETL audit), ensuring the analysis driving business decisions was built on trustworthy data
- Documented and communicated findings to cross-functional, non-technical stakeholders - translating technical investigation results into decisions management could act on

Vrun Minerals Pvt. Ltd. Feb 2024 - Jul 2024

Operations Analyst (Intern)

Dehradun, India

- Built dashboards with deviation highlighting on inventory and sales trends after cleaning and validating distributor/sales datasets with Excel and Python (Pandas) - surfacing the "why" behind performance shifts for non-technical stakeholders
- Documented data workflows and metrics definitions in plain language, reducing disputes over numbers and improving cross-team trust in reporting
- Performed inventory reconciliation and data accuracy checks across daily operations, taking ownership of data sanity end to end
- Conducted business trend analysis to generate actionable insights supporting supply-chain decisions

PROJECTS

Sales & Inventory Trend Analyzer Retail / E-commerce

Analysed 9,994 real US retail transactions across 3 categories and 17 sub-categories; detected 27 seasonal anomalies, computed MoM growth and 3-month rolling averages - directly relevant to "analyze business and product performance to identify trends, issues, and opportunities" in an e-commerce-style dataset

Python · Pandas · Matplotlib · Seaborn · github.com/Zolow-kuni/data-portfolio

Power BI Customer Churn Dashboard Dashboards · Segmentation

Cleaned 10,000 bank customer records (zero nulls); built a 3-page Power BI dashboard with DAX measures tracking a 20.4% churn rate across demographics, credit-score bands, and balance segments - the kind of "dashboard that helps teams monitor key business and product metrics" the role calls for, and a natural input for designing what to A/B test next

Python · Power BI · DAX · github.com/Zolow-kuni/data-portfolio-2

SQL Retail Analysis SQL · RFM · Cohorts

Cleaned and loaded 805,549 rows from 525,461 raw Online Retail II transactions into SQLite; wrote 15 advanced queries covering window functions, CTEs, RFM segmentation, and cohort retention - 5,878 customers across 41 countries - demonstrating the "strong SQL" and "go beyond data retrieval into analysis and interpretation" the JD asks for

SQL · SQLite · Python · github.com/Zolow-kuni/data-portfolio-2

Automatidata EDA - NYC Yellow Taxi 2017 Exploratory Analysis

Full EDA on 408,294 NYC TLC trips; engineered 5 features, applied IQR outlier detection, flagged ~0.5% zero-distance anomalies, and built 4 Python visualisations + a Tableau scatter plot - applying the PACE framework to convert an ambiguous dataset into a clear executive summary

Python · Pandas · Tableau · github.com/Zolow-kuni/data-portfolio

EDUCATION

MBA / PGPM - Operations Management · ICFAI Business School, Mumbai

2025 · CGPA 6.83

Focus areas: data-driven decision making, process optimization, and performance analytics - directly supports the "structured thinking" and "frame ambiguous problems clearly" angles this role emphasizes.

Bachelor of Computer Applications (BCA) · Shree Guru Ram Rai I.T.S., Dehradun

2022 · 72.68%

Foundation in programming (Java, Python), relational databases (SQL), and analytical problem solving.

CERTIFICATIONS

 Google Advanced Data Analytics Professional Certificate (7-of-7 courses)	Google / Coursera	May 2026
Go Beyond the Numbers: Translate Data into Insights	Google / Coursera	May 2026
SQL and PostgreSQL: The Complete Developer's Guide (22 hrs)	Udemy	May 2026
The Power of Statistics	Google / Coursera	May 2026
Power BI Essential Training	LinkedIn Learning	Mar 2026
Data Analysis Using Python	IBM / Credly	Mar 2026

SKILLS

Product & Business Analytics: Funnel Analytics, Conversion & Drop-off Analysis, A/B Testing Principles, Cohort Analysis, RFM Segmentation, Data Storytelling, Product Mindset

SQL & Python: SQL (joins, window functions, CTEs, aggregations), PostgreSQL, SQLite, Python (Pandas, NumPy, openpyxl), Statistical Analysis, Outlier Detection

BI & Visualization: Power BI, Tableau, Streamlit, Plotly, MS Excel (Pivot Tables, Modeling), BI Dashboard Development, Self-serve & Executive Dashboards

Investigation & Operations: RCA / Incident Investigation, KPI Tracking, Metrics Ownership, Data Quality & Integrity, Cross-functional & Client-style Communication

Statistical Modelling: R, ggplot2, randomForest, caret, pROC, Logistic Regression, Decision Trees, ROC / AUC Analysis

Additional: dbt, ELT/ETL Pipelines, Process Automation, Agile, Stakeholder Management
