Dehradun, India · IST (UTC+5:30) · PST-shift compatible · Remote

PROFESSIONAL SUMMARY

Data Analyst with ~1.5 years of hands-on experience in Python (Pandas, NumPy, Scikit-learn), SQL, and statistical analysis - specialising in **data quality validation, anomaly detection, and ML model evaluation workflows**. Built and trained classification models (Logistic Regression, Random Forest, Decision Tree) achieving AUC 0.837; applied Z-score, IQR, and rule-based scoring to flag fraud signals across 283K+ real transactions. Comfortable working with LLM-driven automation pipelines (Claude Code / Anthropic API) and evaluating model outputs for correctness and coherence. **Google Advanced Data Analytics Professional Certificate** (7-of-7 courses, May 2026) including dedicated coursework in machine learning fundamentals. PST-shift compatible (IST UTC+5:30 - early morning India = prior PST evening); experienced async-remote contributor; available immediately.

CORE COMPETENCIES

ML Model Evaluation	Data Quality & Validation	Anomaly Detection	Python · Pandas · NumPy · Scikit-learn	Statistical Analysis
LLM Output Assessment	SQL · PostgreSQL	Prompt Evaluation	Root-Cause Analysis	Data Integrity Workflows
R · Logistic Regression · Random Forest	Async Remote · PST Overlap			

WORK EXPERIENCE

Logistics Integrators Pvt. Ltd.

Mar 2025 - Mar 2026

Data Analyst - Management Trainee Program · Dehradun, India

- Built **SQL-based statistical anomaly detection and threshold-based alerting** on operational and sales datasets - surfacing outliers before they impacted SLAs; mirrors the signal-verification and flagging work central to MLE Bench evaluation tasks
- Drove **data quality and integrity workflows**: validation, reconciliation, ETL audit - eliminating systematic reporting discrepancies across cross-functional reporting systems
- Led **root-cause analysis (RCA)** on performance spikes (shipment delays, cost overruns) - structured investigation workflow: hypothesise → query → validate → document corrective action
- Designed conversion, funnel, and drop-off analysis on shipment journeys; owned weekly Power BI dashboards tracking 10+ KPIs as the team's single source of truth
- Automated recurring reporting workflows in **Python (Pandas, NumPy)**, reducing manual effort and improving turnaround on weekly business reviews

Vrun Minerals Pvt. Ltd.

Feb 2024 - Jul 2024

Operations Analyst (Intern) · Dehradun, India

- Cleaned and validated distributor and sales datasets (Excel + Python/Pandas); performed inventory reconciliation and data accuracy checks across daily operations
- Documented data workflows and measurement requirements, improving metrics transparency for non-technical stakeholders

PROJECTS

Customer Churn Prediction - ML Model Training & Evaluation ML EVALUATION

Trained and evaluated 3 classification models (Logistic Regression, Random Forest, Decision Tree) on 7,043 Telco records. Generated ROC curves, AUC scores, and feature importance charts - **Logistic Regression AUC 0.837, Random Forest 0.824, Decision Tree 0.781**. Produced 8 EDA plots and a comparative model performance report. This end-to-end pipeline - train → evaluate → interpret - directly mirrors the structured evaluation judgment required for ML benchmarking tasks.

R · tidyverse · randomForest · caret · pROC · ggplot2 · [GitHub](#)

Fraud & Anomaly Detection System DATA QUALITY

Applied Z-score, IQR, and a rule-based risk scoring system (0-100) to **283,726 real European credit card transactions** (Kaggle, 284,807 rows). Flagged 2,838 suspicious records at a 0.17% fraud rate - demonstrating the signal-vs-noise discrimination and threshold calibration skills core to evaluating model outputs at scale.

Python · Pandas · NumPy · SciPy · Scikit-learn · [GitHub](#)

career-ops - LLM-Driven Job-Search Automation System LLM TOOLING

Built a production LLM pipeline using **Claude Code (Anthropic API)** that parses job descriptions, scores them against a 6-archetype rubric, and generates tailored CVs via Playwright. Designed and iterated on evaluation prompts, assessed model output quality and coherence, and built YAML-config-driven scoring logic - directly parallel to the prompt evaluation and output assessment tasks on MLE Bench. 33 entries auto-synced in a single batch; 147-application tracker under single source of truth.

Node.js · Claude Code · YAML · Playwright · Notion API · Gmail API

Financial Data Integrity Checker VALIDATION

Engineered a **10-rule validation engine** on 700 real Microsoft financial records: 10/10 rules passed, 14 profit outliers flagged via 3-sigma detection, completeness scored 91-100% per column. Structured rule-based evaluation with quantified pass/fail verdicts - the same evaluation mindset applied to model output assessment.

Python · Pandas · NumPy · Matplotlib · [GitHub](#)

SQL Retail Analysis - Advanced Querying at Scale SQL

Loaded and cleaned **805,549 rows** from 525,461 raw Online Retail II transactions into SQLite; wrote 15 advanced queries (window functions, CTEs, RFM segmentation, cohort retention, MoM revenue growth via LAG) across 5,878 customers and 41 countries.

SQL · SQLite · Python · [GitHub](#)

EDUCATION

MBA / PGPM - Operations Management · ICAI Business School, Mumbai 2025 · CGPA 6.83

Data-driven decision making, process optimization, performance analytics.

Bachelor of Computer Applications (BCA) · Shree Guru Ram Rai I.T.S., Dehradun 2022 · 72.68%

Programming (Java, Python), relational databases (SQL), analytical problem solving.

CERTIFICATIONS

 Google Advanced Data Analytics Professional Certificate (7-of-7 courses - incl. ML Fundamentals)	Google / Coursera	May 2021
The Nuts and Bolts of Machine Learning	Google / Coursera	May 2021
Regression Analysis: Simplify Complex Data Relationships	Google / Coursera	May 2021
SQL and PostgreSQL: The Complete Developer's Guide (22 hrs)	Udemy	May 2021
Python for Data Science	IBM / Credly	Apr 2026
Data Analysis Using Python	IBM / Credly	Mar 2026
2025 Mastering dbt (Data Build Tool) - Beginner to Pro (8 hrs)	Udemy	May 2021

SKILLS

ML & Statistical Analysis: Scikit-learn, Logistic Regression, Random Forest, Decision Trees, ROC/AUC, Z-score, IQR Outlier Detection, Threshold Calibration, R (tidyverse, caret, pROC, ggplot2)

Python & Data Engineering: Python (Pandas, NumPy, openpyxl), SQL (joins, window functions, CTEs, aggregations), PostgreSQL, SQLite, dbt Core, ETL Validation, Data Quality, Process Automation

LLM & AI Tooling: Claude Code (Anthropic API), Prompt Design & Evaluation, LLM Output Assessment, YAML-config Pipelines, Playwright Automation

Visualization & BI: Power BI, Tableau, Streamlit, Plotly, MS Excel (Pivot Tables, Modeling)

Work Style: Async Remote, PST-shift compatible (IST UTC+5:30), Structured Documentation, Cross-functional Data Validation, Stakeholder Communication
