Hiring Team

VRINDA INTERNATIONAL

Dehradun, India

Re: Business Analyst (Freshers) - Application

I am applying for the Business Analyst (Freshers) role at VRINDA INTERNATIONAL. As a Dehradun resident with ~1.5 years of hands-on experience in data analysis, process documentation, and stakeholder reporting, I am ready to contribute from day one -- with no relocation needed and immediate availability.

In my role as a **Data Analyst at Logistics Integrators Pvt. Ltd.**, I worked directly with cross-functional teams to gather business requirements, document data workflows, and translate operational questions into structured dashboards and analyses. I owned weekly Power BI reports tracking 10+ KPIs for management, led root-cause investigations on process gaps, and documented corrective action plans -- all core Business Analyst responsibilities. Alongside this, I completed the **Google Advanced Data Analytics Professional Certificate** (7/7 courses, May 2026) and built 9 portfolio projects across SQL, Python, Power BI, and Tableau on real datasets totalling 1.2M+ records.

Three things I'd bring to this role on day one:

- 1. Requirements-to-reporting pipeline.** I have converted ambiguous business requests into documented measurement frameworks and live dashboards -- the full BA loop from intake to delivery.
- 2. SQL + Excel depth.** Advanced SQL (window functions, CTEs, cohort analysis) and Excel (Pivot Tables, modeling) are my daily tools. I can hit the ground running without a ramp-up period on tooling.
- 3. Local presence, immediate start.** I am based in Dehradun. No relocation friction, no notice delay -- I can join as soon as the team needs me.

I would welcome the chance to discuss how my background maps to your current priorities. My portfolio is at github.com/Zolow-kuni/data-portfolio.

Warm regards,

Subham Joshi
